STAINLESS STEEL SUBMERSIBLE PUMPS

AYKO stainless steel bore hole submersible pumps are multistage centrifugal type and are designed to deliver best efficiency. All hydraulic components are fabricated with high grade non-magnetic corrosion resistant SS304 / SS316 stainless steel materials for hygienic water supply and longer life. All components are precisely machined & balanced to have excellent mechanical stability and withstand high torque. These pumps are provided with inbuilt Check valve to prevent back flow of water. These pumps are available with combination type NEMA standard mounting dimensions also to suit with higher and lower diameter NEMA Standard motors.
